

WE ARE LOOKING FOR A Engineer for Microfluidic

We develop insights- for the health and life of people

We are a leading, future-oriented young company for biosensors and digital diagnostic platforms. We build the core competencies of our company on the qualifications of our employees and their many years of practical experience. At our location in Berlin-Adlershof with about 30 employees we develop and produce a novel digital diagnostic platform for rapid antibody diagnostics and soon also revolutionary DNA rapid diagnostics.

We address industrial companies, laboratories, physicians, clinics and pharmaceutical companies that require timely results and reliable statements in the field of immune and targeted DNA diagnostics.

The company is constantly growing. We are looking for a
Engineer for Microfluidic

Your tasks

- Support in development of electrical engineering, technical conception of measurement setup and technology as well as control software
- Assistance in the conception and development of microfluidics and platform design
- Reinforcement in production and device construction
- Transfer of laboratory samples into prototypes, considering the interaction of device and microfluid components
- Optimization during implementation and later production by introducing own ideas

Your profile

- Completed studies (Master/Dipl. Ing.) in the field of mechanical engineering, microsystems technology, medical technology or comparable field of study
- Professional experience in a technical environment
- Knowledge and experience in process development and microfluidics
- Experience in special prototyping and electronics
- Experience in the field of fluid handling such as HPLC, LC, vacuum technology or micro-dosing
- Ideally experience in areas of measurement technology of biochemical systems (fluorescence, absorption, specific exposure, sensor technology)

WE ARE LOOKING FOR A Engineer for Microfluidic

- Ideally knowledge in CAD and at least one of the languages C, C++, html, php, javascript or Django
- Understanding of biological basics and correlations
- Fluent skills in Business English and German language
- MS-Office skills

Your personality

- Independent, analytical and structured way of working
- Enjoys practical laboratory work as well as working with equipment and software
- Team player with a passion for innovative and interdisciplinary work

Our offer

- A great team in a company that is on a very successful path
- Personal and professional career opportunities
- Benefits such as company pension plan
- Free drinks (coffee, tea, water) fruit and vegetables in the office
- Possibility of mobile working
- Freedom to develop and implement your own ideas
- Attractive compensation
- A dynamic and innovative working environment in the heart of the biotech scene in Berlin-Adlershof

If you would like to be part of something big and you see yourself in the profile, we look forward to receiving your complete application documents with earliest possible starting date to Sabine Massenkeil-Kultus, career@inventicsdx.com.
